

City of Houston—Public Works & Engineering
Code Enforcement Green Building Resource Center

Presents an Education Seminar in partnership with the Texas Gulf Coast Chapter of the US Green Building Council

Engineering Green Buildings

What goes into designing more resilient green buildings to use less energy and make it a healthier place to occupy? Mechanical, Electrical, and Plumbing engineers design building systems do more for less. What are the trends these days? And what are the trends for commissioning, that process of making sure that all equipment works as intended? Are there any new developments with structural engineering to (again) do more for less? What is the direction with the energy codes, and how does that play into green building?

Speakers.....

- John Hand, PE,**
Arup
- Michael Howard, CE,**
City of Houston Code Enforcement
- Michael Largent, PE,**
Wylie Consulting Engineers
- David MacLean, CPMP, LEED AP**
Sebesta

Held in the Green Building Resource Center located in the Houston Permitting Center with its LEED Gold Certification since 2012. The GBRC is Houston's best location for seeing displays of green building materials and strategies.
